

Enterprise

Direct support from the
engineers who build Avalonia

One agreement for your organization

Engineering backup when it matters

The framework stays free. Enterprise gives your team a direct relationship with the people behind it.

01

A release is blocked

A private route to the engineers who maintain the framework.

02

A major architecture decision

Reviews before your team commits to a platform or rendering approach.

03

Upgrades compete with feature work

LTS security updates and critical fixes let your roadmap set the pace.

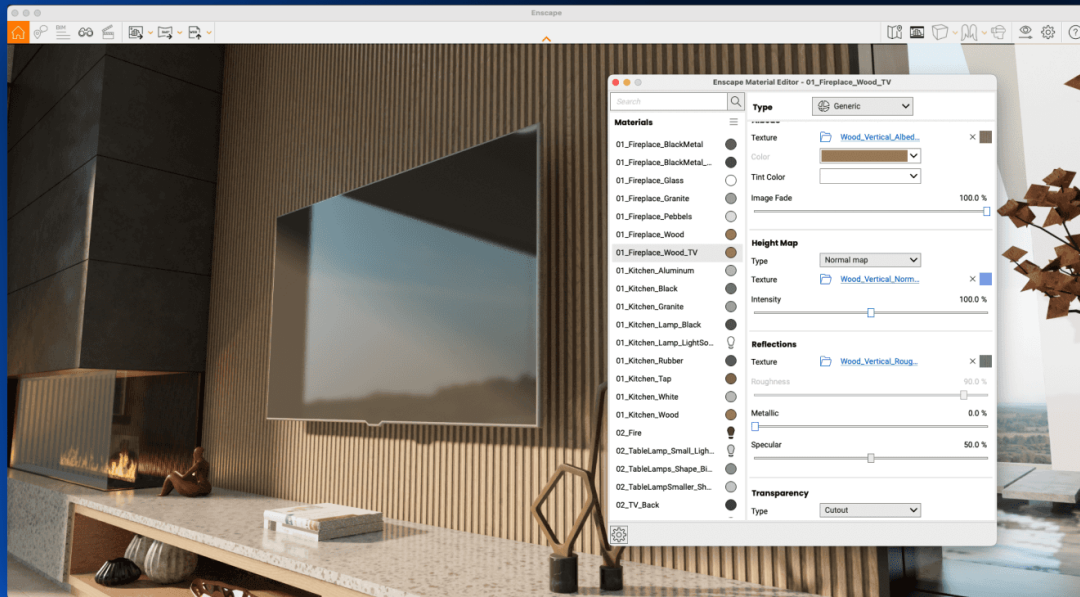

04

Another team adopts the stack

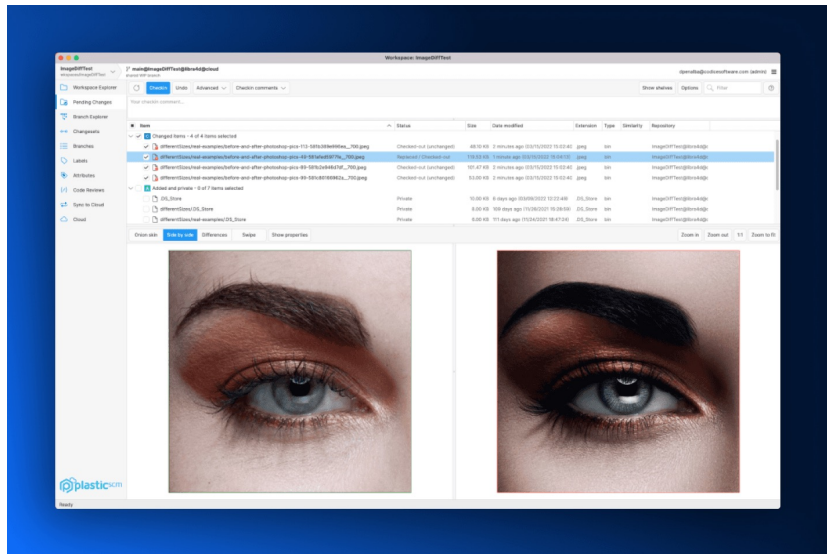

One agreement. Add seats with the same Enterprise benefits.

...we got a direct support contract with the Avalonia team and that also helped us a lot in critical moments.”

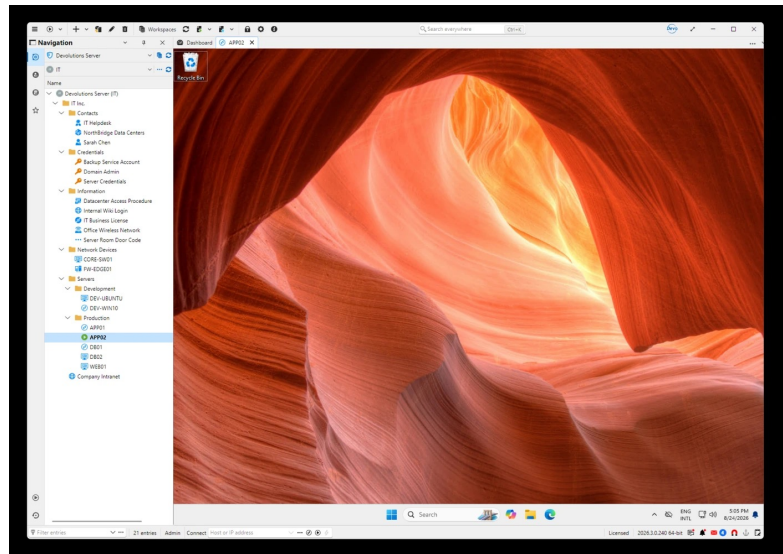

Production software, built with Avalonia

3 to 1

Unity

Desktop UI codebases

100%

Devolutions

Windows UI migrated

When a release is blocked, you have a direct route

1 day

Initial response

Within one EU working day

8 hours

Critical issue response

Three critical escalations per year

Private tickets go to the engineers who maintain Avalonia. Release blockers escalate to the executive team. Emergency hot patches ship in the nightly feed first.

Offline by design

Develop on networks
without internet access.

Enterprise activates premium tooling and commercial components offline. No mandatory cloud service or license server.

Support from the engineers who build your tools

Every support request goes directly to the engineers who build and maintain Avalonia's products, SDKs and tools.

98.3%

Customer satisfaction

60%

Resolved in the first response

7h 22m

Average response time

5

YEARS

Keep a stable release supported

Five years of security updates for designated Avalonia LTS releases, with critical fixes backported to supported releases.

Extended Support is available as a separately scoped add-on for a longer maintenance window.

Your team can see the code behind the UI

Avalonia framework

Open source under MIT

Review the framework implementation
and its dependencies.

Commercial controls

Full source with Enterprise

Trace issues into the controls and
inspect how they work.

Lower rates as your team grows

\$24,000 USD per year includes
the first 3 seats.

Seat numbers	Per added seat / year
4–10	\$2,450
11–25	\$1,750
26+	\$1,250

USD, annual, excluding tax. Each rate applies only within its band.
EUR and GBP pricing: avaloniaui.net/enterprise

One agreement

Every seat. Full Enterprise benefits.

Add developers as teams grow.
Lower rates start at seats 11 and 26.

Architecture guidance, throughout the year

An annual architectural audit

Avalonia engineers review your application and provide written recommendations.

Quarterly technical check-ins

Review decisions and plan your next steps. Roadmap access is available on request.

4

video consultations
per seat, per year

Time with the engineers who
build and maintain Avalonia.

Platforms and developer tools

Feature	Avalonia	Plus	Pro	Enterprise
Platform				
Windows	Yes	Yes	Yes	Yes
